

AMENDMENTS TO THE SPECIFICATION

Please replace the paragraph beginning on page 8 line 2 of the as-filed application (corresponding to paragraph [0015] of published patent application US2005/0207390A1) with the following replacement paragraph:

FIG. 1 shows a system **100** for sending text-based communications to a network access device, constructed according to one embodiment of the present invention. In **FIG. 1**, a communications network **105**, also referred to herein as a “network” or “data network,” is shown. Various communication services and networks, and combinations thereof, can serve as network **105**. These include conventional telephone networks, wireless networks such as cellular and paging service networks, and other networks with messaging service capabilities. Examples of suitable cellular and paging networks include services such as Pageant, Skytel, and Pagemart. Other suitable paging and messaging services include Personal Communications Systems (PCS), Global System For Mobile (GSM), DCT-1800, DCT-1900, 900 ~~Mhz~~ MHz GSM, and Enhanced Specialized Mobile Radio (EPSMR). Suitable text-based communications networks include Short Message Service (SMS), Enhanced Messaging Service (EMS), and Multimedia Messaging Service (MMS).
